

Four

Ferruccio Laviani 2005

The second version of Four is more sophisticated and researched in its use of its component materials. It includes a satined aluminium table top combined with a painted steel structure. There are also three rectangular versions with lengths of 158, 190 and 223 cm and a square version with a 128 x 128 cm top. The laminated aluminium top makes Four a more elegant and representative table, ideal not only for corporate offices and meeting rooms but also as a dining table.

		width	height	depth	weight kg.
4527		158	72	79	44,400
4528		190	72	79	49,400
4529		223	72	79	54,400
4530		128	72	128	55,000
