

STACKED SHELVING SYSTEM

JULIEN DE SMEDT ARCHITECTS ON THE DESIGN "How to be specific and generic altogether? Shelving systems have a tendency to achieve one concern but never both. We decided to dimension shelving units based on the generic measurements of things to store and display while allowing for them to be combined according to specific needs and desires. The result can be at times a random stack of boxes or a coordinated grid of efficient storage... or both!"

ABOUT THE DESIGNER

Copenhagen-based Julien De Smedt is the co-founder of PLOT and an internationally acclaimed architect. He is recognized for his ability to always take a fresh look at things. His works challenge conventions and many have been awarded.

CATEGORY

Acoustic panels

ENVIRONMENT

Indoor

COUNTRY OF PRODUCTION

China

PREASSEMBLED

Yes

DESCRIPTION

Easily installed sound absorbing panels for the Stacked Storage system. A great way to have plenty of storage space, while ensuring a better working environment, all provided by the same furniture piece.

PRODUCTION PROCESS

The fibers are worked together like mats, which can be pressed over heat-influenced forms that enables the material to maintain it's shape.

MATERIAL

Polymer Felt

CLEANING AND CARE

Remove dust from shelves with a soft cloth. When necessary clean with moist cloth. For wood veneer finishes, dry immediatly with a soft cloth following wood grains. The wood should not be exposed to excessive heat, direct sunlight or humidity.
